

INFORMATION SYSTEMS ANALYST

The Board of Governors of the Federal Reserve System, which serves as the nation's central bank, is seeking an Information Systems Analyst responsible for the design, implementation, and support of complex automated distributed systems, essential to carrying out the responsibilities and daily activities of division or Board staff. The analyst uses initiative and resourcefulness in solving unusual problems and in developing new procedures. Ability to obtain a top secret clearance.

Qualifications:

- Bachelor's Degree or equivalent experience.
- Minimum of three years of related work experience.
- Requires technical proficiency in networking, including Microsoft Active Directory (Windows 2000 and Windows 2003), Microsoft XP workstations, switches and routers, antivirus services, imaging software, backup services, and one or more high-level programming languages.
- Experienced in problem diagnosis and resolution.
- Able to communicate complex technical concepts in non-technical language.
- Possesses strong oral and written communications and interpersonal skills.
- Highly experienced in computing, systems programming, automation or database management.
- May require some physical labor to install computer hardware

The Board offers an excellent benefits and compensation package including medical/dental insurance, retirement plan, transportation subsidy, and academic assistance. If interested in applying, submit resume online at www.federalreserve.gov. Click on "All" to apply. Click on requisition 004417/EDP Auditor. Click on submit resume or fax at 202-452-3863. Must reference job code 004417/int-ISACA on all correspondence. The Board of Governors is an Equal Opportunity Employer.
